Author Index—Volume 31 (1999)

(The issue number is given in front of page numbers)

Alonso-Mallo, I., Explicit single step methods with optimal order of convergence for partial differential equations (2) 117–131
Aubry, N., see **Rahibe, M.** (1) 103–115

Barton, P.I., see **Galán, S.** (1) 17– 47
Botchev, M.A., G.L.G. Sleijpen and H.A. van der Vorst, Stability control for approximate implicit time stepping schemes with minimum residual iterations (3) 239–253
Buchholz, P., Structured analysis approaches for large Markov chains (4) 375–404

Cameron, F., A class of low order DIRK methods for a class of DAEs (1) 1– 16
Chisholm, T.T., see **Zingg, D.W.** (2) 227–238
Choi, H., M. Hinze and K. Kunisch, Instantaneous control of backward-facing step flows (2) 133–158

de Swart, J.J.B., see **van der Houwen, P.J.** (3) 353–374

Ewing, R.E., J. Wang and S.L. Weekes, On the simulation of multicomponent gas flow in porous media (4) 405–427

Feehery, W.F., see **Galán, S.** (1) 17– 47
Ferrándiz, J.M., see **Martín, P.** (2) 183–189
French, D.A., S. Jensen and T.I. Seidman, Finite element approximation of solutions to a class of nonlinear hyperbolic–parabolic equations (4) 429–450

Galán, S., W.F. Feehery and P.I. Barton, Parametric sensitivity functions for hybrid discrete/continuous systems (1) 17– 47

Hinze, M., see **Choi, H.** (2) 133–158
Horváth, R., Maximum norm contractivity in the numerical solution of the one-dimensional heat equation (4) 451–462
Hu, Q., Multilevel correction for discrete collocation solutions of Volterra integral equations with delay arguments (2) 159–171

Idelssohn, S., see **Löhner, R.** (3) 271–293

Jbilou, K., A. Messaoudi and H. Sadok, Global FOM and GMRES algorithms for matrix equations (1) 49– 63
Jensen, S., see **French, D.A.** (4) 429–450
Jézéquel, F., A validated parallel across time and space solution of the heat transfer equation (1) 65– 79

Kunisch, K., see **Choi, H.** (2) 133–158

Laburta, M.P., Starting algorithms for the iterations of the RKN–Gauss methods (1) 81–101
Linß, T. and M. Stynes, A hybrid difference scheme on a Shishkin mesh for linear convection–diffusion problems (3) 255–270
Löhner, R., C. Yang, E. Oñate and S. Idelssohn, An unstructured grid-based, parallel free surface solver (3) 271–293

Elsevier Science B.V.

Lynch, M.A.M., Large amplitude instability in finite difference approximations to the Klein–Gordon equation (2) 173–182

Maroni, P., Semi-classical character and finite-type relations between polynomial sequences (3) 295–330

Martín, P. and J.M. Ferrándiz, Numerical integration of perturbed linear systems (2) 183–189

Meerbergen, K. and M. Sadkane, Using Krylov approximations to the matrix exponential operator in Davidson's method (3) 331–351

Messaoudi, A., see **Jbilou, K.** (1) 49–63

Messina, E., see **van der Houwen, P.J.** (3) 353–374

Mikula, K. and D. Ševčovič, Solution of nonlinearly curvature driven evolution of plane curves (2) 191–207

Notay, Y., A multilevel block incomplete factorization preconditioning (2) 209–225

Oñate, E., see **Löhner, R.** (3) 271–293

Rahibe, M., N. Aubry and G.I. Sivashinsky, Bifurcations in a planar propagating flame as the size of the domain increases (1) 103–115

Sadkane, M., see **Meerbergen, K.** (3) 331–351

Sadok, H., see **Jbilou, K.** (1) 49–63

Seidman, T.I., see **French, D.A.** (4) 429–450

Ševčovič, D., see **Mikula, K.** (2) 191–207

Sivashinsky, G.I., see **Rahibe, M.** (1) 103–115

Sleijpen, G.L.G., see **Botchev, M.A.** (3) 239–253

Stynes, M., see **Linß, T.** (3) 255–270

van der Houwen, P.J., E. Messina and J.J.B. de Swart, Parallel Störmer–Cowell methods for high-precision orbit computations (3) 353–374

van der Vorst, H.A., see **Botchev, M.A.** (3) 239–253

Wang, J., see **Ewing, R.E.** (4) 405–427

Weekes, S.L., see **Ewing, R.E.** (4) 405–427

Yang, C., see **Löhner, R.** (3) 271–293
